Download and run the trial of Driver Booster. Software protects yourself with high- level security. product license. You will be asked to do a quick install in the beginning. You will then be taken to the interface and the downloading process can begin. Gain access to the majority of your games and drivers with Nvidia GeForce experience in minutes. Choose from Device Driver, Game Driver, and your favorite hardware component. Driver Booster also features a separate GPU and hardware section that is where Device, Game, and Hardware properties are stored. Learn more about Driver Booster The new Driver Booster interface is easier to use with Windows 8 and Windows 10. It is also user-friendly on the web. It now supports an online database that stores drivers for all kinds of devices. The Driver Booster interface consists of three components. Each component features dedicated tabs. The first component contains the new Driver Booster interface. This is the new driver interface. On the left, you will see a list of all your device drivers. If you click on one of the devices, the new driver interface will open. It contains a very detailed setup menu and in the main window, you will see a list of every driver. If a driver will be installed, an installation button will appear. Click on the button to

start the installation process. If you want to install the driver manually, you can use the buttons on the left. However, most people will probably want to start the installation process automatically. For that, you can start the installation process by clicking on the install button. At the bottom of the new driver interface, you will see a list with all your drivers and devices. Click on the device to open the drivers tab. The new Driver Booster interface works best for people with a lot of devices. However, if you have a very basic setup, there will be few devices in the list. It is now possible to sort the devices by using the column sort buttons. You can also use the filter tool in the new driver interface. You can search for specific devices, and you will then see the results in the top half of the list. You can also filter the results. If you want to hide a specific driver, you can use the Hide button. You can also modify the active status of the driver with the buttons on the right. You can also use the new Driver Booster interface to activate a driver. You will need to install a new driver with every operating system update.
